

DECLARATION

This is to confirm that the Microstacker™ Polymer Detection Kit, designed for use with the CNT 320 system, is fully suitable for the following applications:

1. Immunohistochemistry (IHC)
2. Multiplex Immunohistochemistry (Multiplex IHC)
3. In Situ Hybridization (ISH)

The Microstacker™ Polymer Detection Kit has been rigorously tested to ensure compatibility and optimal performance with these applications, providing reliable and high-quality results.

For further information or technical support, please do not hesitate to contact our team.
